

Pupil premium strategy statement

This statement details our school's use of pupil premium (and recovery premium for the 2022 to 2024 academic year) funding to help improve the attainment of our disadvantaged pupils.

It outlines our pupil premium strategy, how we intend to spend the funding in this academic year and the effect that last year's spending of pupil premium had within our school.

School overview

Detail	Data
School name	Newland School for Girls
Number of pupils in school	627
Proportion (%) of pupil premium eligible pupils	45%
Academic year/years that our current pupil premium strategy plan covers	1
Date this statement was published	27/9/2023
Date on which it will be reviewed	1/10/20234
Statement authorised by	V. Callaghan
Pupil premium lead	E Martinson
Governor / Trustee lead	B. Maxwell

Funding overview

Detail	Amount
Pupil premium funding allocation this academic year	£ 299, 795
Recovery premium funding allocation this academic year	£ 41,760
Pupil premium funding carried forward from previous years (enter £0 if not applicable)	£0
Total budget for this academic year If your school is an academy in a trust that pools this funding, state the amount available to your school this academic year	£ 311 760

Part A: Pupil premium strategy plan

Statement of intent

- Our intent at Newland is to enrich the lives of all our students, no matter their background or prior attainment. To that end, we aim to both raise the achievement of all our learners, as well as ensuring that we close the gap between our student groups. At Newland, we have a much higher than national average number of students with Pupil Premium funding. It is therefore right to ensure most of their needs are increasingly met through high quality universal provision. Our model to achieve success with these students is therefore as follows:
- The progress and achievement of all students is rigorously monitored and evaluated throughout key points in the academic year. Any of our girls (whether disadvantaged, LAC or Service Children) who are identified as requiring support will receive the necessary help to achieve. This is coordinated by our Senior and Wider Leadership Team, and Pastoral Mentors through regular meetings and academic reviews.
- We will ensure that our designated senior leader (Mrs Martinson) has a clear overview of how the funding is being allocated and will measure the impact to ensure a difference is made to students' outcomes and achievement.
- We have ring fenced the funding so that it is always spent on supporting the targeted students. We provide a tailored and personal approach to Pupil Premium for our girls.

Challenges

This details the key challenges to achievement that we have identified among our disadvantaged pupils.

Challenge number	Detail of challenge
1	Low Literacy levels
2	Lack of resilience, low aspirations or difficulty in establishing positive relationships
3	Poor recall and knowledge retention limits progression onto application of knowledge or skills
4	Attendance- PP attendance is below Non PP national average at 87.8% . Persistent absence is above the national average at 29%
5	Parental engagement - reduced attendance at parents evenings and school events and ineffective support for school attendance negatively impacting students aspirations
6	Poor Health - associated with adverse childhood experiences which have long term impact on physical and mental health

Intended outcomes

This explains the outcomes we are aiming for **by the end of our current strategy plan**, and how we will measure whether they have been achieved.

Intended outcome	Success criteria
Improve outcomes for PP students	Less than 5% attainment gap in Basics 9-7, 9-5 and 9-4 PP attainment 8 >44.00 Uptake at Intervention - no gap, H/W referrals - no gap, Equipment referrals - no gap, T&L - PP first evident in 100% of lessons
Improve health and wellbeing and therefore increase PP attendance	Whole school attendance above 94.% PP attendance gap <3% PP PA <25%

Activity in this academic year

This details how we intend to spend our pupil premium (and recovery premium funding) **this academic year** to address the challenges listed above.

Teaching (for example, CPD, recruitment and retention)

Budgeted cost: £ 58 809

Activity	Evidence that supports this approach	Challenge number(s) addressed
<p>Developing self efficacy and a teaching an learning culture of high expectation for disadvantaged students</p>	<p>Against the Odds: Achieving greater progress for secondary students facing socio-economic disadvantage – research report (2021) – Social Mobility Commission</p> <p>This report explores a range of ideas which may be useful to consider. Successful findings include: vertical tutoring and mixed attainment classes at Key Stage 3 were associated with higher rates of progress for pupil premium students; the staff culture regarding pupil premium was found to be an important factor – concerningly, in some schools, as many as a quarter of staff have reservations about the pupil premium, seeing it as discriminatory or ineffective. It was also found that mechanisms for listening to students in schools was not well developed. Whilst the report makes interesting reading, there were three key recommendations for school leaders:</p> <ul style="list-style-type: none"> · School leaders should regularly explore staff attitudes towards the pupil premium, how well their school responds to the needs and circumstances of its students, and the impact of their policies on students' wellbeing. · When schools have had little success at reducing the progress gap, they should refocus on a small number of critical, context-specific issues, 	<p>1,2,3,4</p>

	<p>such as improving the experience of transferring students or reducing student absence.'</p> <p>The report found that 96% of teachers surveyed reported that they are required to provide PP students with additional attention or support, e.g. marking their books first, asking more questions during lessons, handing materials to them first etc. – but it was also found that schools have had mixed results from this.</p>	
<p>Literacy interventions</p> <ul style="list-style-type: none"> ● Tier 3 ● Vocabulary ● WOW ● Reading lessons 	<p>Research for education inspections framework cites Huttenlocher, 2010 and Gilkerson 2018 to highlight evidence of the Vocabulary gap that exists between disadvantaged students and their peers. Most GCSE papers require a reading age of 15 years however 33% of our Y7 students have a reading age greater than 12mths below chronological reading age.</p> <p>KS2 QLA and GL progress test data shows that the weakest aspect of many of our students reading is inference. Disciplinary Literacy CPD indicates that modelling reading and low stakes testing develops inference. The EEF Toolkit indicates on average, reading comprehension approaches deliver an additional six months' progress. Successful reading comprehension approaches allow activities to be carefully tailored to pupils' reading capabilities, and involve activities and texts that provide an effective, but not overwhelming, challenge</p>	1,2
MFL Intervention	<p>The average impact of the small group tuition is four additional months' progress, on average, over the course of a year.</p> <p>Evidence shows that small group tuition is effective and, as a rule of thumb, the smaller the group the better. Some studies suggest that greater feedback from the teacher, more sustained the engagement in smaller groups, or work which is more</p>	1,2,3,5

	closely matched to learners' needs explains this impact. Once group size increases above six or seven there is a noticeable reduction in effectiveness	
Revision resources	Following the EEF 7 step model of revision in practice our aim is to activate students prior knowledge and via; explicit instruction, modelling and guided practice enable the student to complete their own independent revision. In order to achieve this students require high quality revision resources. The purchase of this can be a barrier to disadvantaged families.	1,2,3,5

Targeted academic support (for example, tutoring, one-to-one support structured interventions)

Budgeted cost: £ 25000

Activity	Evidence that supports this approach	Challenge number(s) addressed
Provision of taxi transport home from after school intervention sessions to promote attendance	<p>The average impact of approaches involving extending school time is about an additional three months' progress over the course of a year. The average impact is influenced by the targeted use of before and after school programmes, which have higher impacts on average. The impact is also slightly lower when school time is extended in secondary school.</p> <p>The research also indicates that attracting and retaining pupils in before and after school programmes is harder at secondary level than at primary level. To be successful, any extension of school time should be supported by both parents and staff. It should also be noted that more extreme increases may have diminishing effects if engagement of pupils is reduced.</p>	3,5,6
Revision Residential	Metacognition and self-regulation approaches aim to help pupils think about their own learning more explicitly, often by teaching them specific strategies for planning, monitoring and evaluating their learning. Interventions are usually designed to give pupils a repertoire of strategies to choose from and the skills to select the most suitable strategy for a given learning task.	3,5,6

	<p>Self-regulated learning can be broken into three essential components:</p> <ul style="list-style-type: none"> • cognition - the mental process involved in knowing, understanding, and learning; • metacognition - often defined as 'learning to learn'; and • Motivation - willingness to engage our metacognitive and cognitive skills. <p>Metacognition and self-regulation approaches have consistently high levels of impact, with pupils making an average of seven months' additional progress.</p> <ul style="list-style-type: none"> • The evidence indicates that teaching these strategies can be particularly effective for low achieving and older pupils. 	
--	--	--

Wider strategies (for example, related to attendance, behaviour, wellbeing)

Budgeted cost: £ 219,573.67

Activity	Evidence that supports this approach	Challenge number(s) addressed
Music lessons -To improve cultural capital and engagement of PP students	Overall, the impact of arts participation on academic learning appears to be positive but low. Improved outcomes have been identified in English, mathematics and science. Benefits have been found in both primary and secondary schools, with greater effects on average for younger learners and, in some cases, for disadvantaged pupils. Wider benefits such as more positive attitudes to learning and increased well-being have also consistently been reported.	5,6,7
Breakfast for all	EEF evaluation found that supporting schools to run a free of charge, universal breakfast club before school delivered an average of 2 months' additional progress.	7
Food Tech ingredient provision	One barrier to attendance for PP students is their ability to fund participation in Food technology.	5,6

Hardship fund	Feedback from Pixl meetings and the DFE Understanding KS4 attainment and progress report reinforces the need to identify individual barriers to education for PP students. For a number of our students these barriers are material in the case of uniform or equipment or may be the requirement for support to access extracurricular or enrichment activities	5,6
Attendance officer, safeguarding lead and Year leaders	The Joseph Rowntree Foundation published a report in 2002 on girls and exclusion from school. The report notes that truancy, or 'self-exclusion', is one of a range of strategies that girls may use to cope with difficulties at school. It found that bullying, especially psychological bullying, is a significant factor in causing girls to self-exclude, and often goes unrecognized. It adds that many girls are unwilling to access the forms of support available to them. Factors such as parentally-condoned absence, low aspirations and caring responsibilities can also contribute to truancy among girls. In cases of Persistent absenteeism bespoke solutions must be found in order to break down barriers to attendance. The attendance officer and year leaders are on the front line on creating a culture of attendance. Challenging and following up on absenteeism and forging relationships with our most disengaged parents in order to identify barriers to attendance.	4,6,7
Attendance Rewards		
School Nurse and counselling services and Hub wellbeing provision	Emotional wellbeing is a clear indicator of academic achievement, success and satisfaction in later life. Evidence shows that mental health and wellbeing programmes in schools, can lead to significant improvements in children's mental health, and social and emotional skills. Wellbeing provision in schools can also lead to reductions in classroom misbehaviour and bullying.90% of school leaders have reported an increase in the number of students experiencing anxiety or stress over the last five years. Concurrently, referrals to specialist mental health services nearly doubled between 2010-11 and 2014-15. As a result, NHS Child and Adolescent Mental Health Services (CAMHS) are overwhelmed. Currently, just one in four children with a diagnosable mental health problem gets access to the treatment and care that they need. Despite improvements since, waiting times remain too long, and high thresholds for access to care are causing an unnecessary escalation of need. To reduce the burden on the NHS, there needs to be a greater focus on prevention through early identification and intervention. We aim to support this by facilitating access to counselling services during the school day.	7
Broadening Cultural Experiences -	Overall, the impact of arts participation on academic learning appears to be positive but low. Improved outcomes have been identified in English, mathematics and science. Benefits have been found in both primary and secondary schools, with greater effects on average for younger learners and, in some cases, for disadvantaged pupils.	2,5

	<p>Some arts activities have been linked with improvements in specific outcomes. For example, there is some evidence of a positive link between music and spatial awareness and between drama and writing. Wider benefits such as more positive attitudes to learning and increased well-being have also consistently been reported.</p> <p>https://educationendowmentfoundation.org.uk/evidence-summaries/teaching-learning-toolkit/arts-participation/</p>	
Newland Flyers	<p>Research to understand successful approaches to supporting the most academically able disadvantaged pupils (2018) – DfE</p> <p>The findings in this report are based on a small-scale qualitative study, but may be of use as the <i>Potential for Success</i> Sutton Trust report (Motecute, 2018) highlighted that ‘there is currently little evidence on how best to support highly able students, and even less on how to support students who are capable of high attainment who are from disadvantaged backgrounds’.</p> <p>A key finding from this research was that a suite of activities, as opposed to a single intervention, was successful in supporting the most academically able disadvantaged learners. Interventions across four areas were deemed to be needed: academic extension, cultural enrichment, personal development and the removal of financial barriers to achievement. It is worth noting that these areas were supported by working in partnership with parents, universities, local businesses and other external sources.</p>	2,5

Total budgeted cost: £ 301, 382.67 Any expenditure over and above the pupils premium allowance and recovery funding will be draw from the school budget

Part B: Review of outcomes in the previous academic year

Pupil premium strategy outcomes

This details the impact that our pupil premium activity had on pupils in the 2020 to 2021 academic year.

Other approaches																																																								
Action	Intended outcome																																																							
Music lessons	To improve cultural capital and engagement of PP students	Overall 65 students received music tuition in 2021 2022. 35 of these were PP students	Continue to publicize music tuition and offer singing which has largest uptake																																																					
Breakfast for all	To improve attainment outcomes and promote health by increasing the number of students who eat breakfast	Breakfast for all student continues to be provided at breaktime.	Continue to provide toast at breaktime																																																					
Food Tech ingredient provision	To increase PP attendance	No students did not complete food technology practicals as a result of lack of ingredients	Ensure that the same level of support is offered for GCSE practicals. Investigate central purchasing options with Parent pay available.																																																					
Hardship fund	To increase PP attendance and access to the curriculum	Although attendance remains below pre-pandemic levels we were above both the DFE and FFT national averages for 2021 2022.	The impact of attendance rewards was measured and on reflection only the autumn and summer term trips appear to have a significant impact. As a result these will be continued in 2022 2023. Smaller and more frequent rewards will be issued with freddos weekly for all students with 100% attendance weekly and half termly 100% reward lunches.																																																					
Attendance officer, safeguarding lead and Year leaders	To increase PP attendance	In years 7.8.9.and 11 PP attendance was above the national average, significantly so in Year 7,8, and 11.
